GREAT SOUTH 

SOUTHLAND TOURISM SNAPSHOT

Year End June 2019

Guest nights up 1.5% to 1,201,109

Total spend up 3.3% to \$673M

Southland is continuing to experience stable growth phase in spend across both domestic and international markets, including good growth of the UK, German and US markets. There have also been modest gains in both international and domestic commercial accommodation figures, despite growth in Airbnb listings.

SOUTHLAND RTOS

Statistics New Zealand defined geographic areas for Southland's two RTOs (as at June 2019)

RTO stands for 'Regional Tourism Organisation'; they exist across NZ. RTOs are responsible for destination marketing - the promotion of their regions to potential domestic and international visitors.

Destination Fiordland is defined as Fiordland National Park, Manapouri, Te Anau and Te Anau Downs. It is important to note that Destination Fiordland is a membership based agency that has, or has had in the past, members beyond these boundaries. This definition allows Destination Fiordland, with disclosure to Great South (Southland NZ), to continue targeting other operators outside of the areas marked on this map.

ABOUT THESE STATISTICS

All figures are annual year end to the latest month available. This allows comparison of market trends against the previous year however it means that not all the data in this report is for the current month.

Data is provided for:

- Southland Region
- Territorial Local Authorities (TLAs)
 - Invercargill City
 - Gore District
 - Southland District
- Regional Tourism Organisations (RTOs)
 - Southland RTO
 - Fiordland RTO

Great South continues to work with tourism operators to build their profile and develop more reasons for both domestic and international markets to spend more while they are in the region.

SOURCES

Monthly Regional Tourism Estimates – Ministry of Business, Innovation & Employment - June 2019

The MRTEs measure the expenditure of domestic and international visitors in regions across the country. Users can filter the information, e.g. by country of origin, tourism product grouping such as accommodation, transport and retail sales, and by year.

Airbnb figures are based on searches undertaken each month by Great South and rely on individual listings being accurately coded to the correct region keyword.

Commercial Accommodation Monitor – Ministry of Business, Innovation & Employment - June 2019

Definition of 'stay-units': Number of rooms available in Hotels and Motels, number of beds in backpackers, number of sites in holiday parks.

A note on 'average length of stay': This is a great way to measure the availability of accommodation and experiences that entice tourists to stay longer. However, increases and declines in this figure often appear better/worse than they actually are. For example, a drop of 2% may seem bad, but equates to only an hour in real terms.

Total domestic (and international) guest nights spent in short term accommodation (hotels, holiday parks, backpackers and motels), by month and year.
